PRAKATA PENERBIT

Pada awal tahun 1981, Dewan Bahasa dan Pustaka merancang suatu projek bagi penyediaan dan penerbitan istilah untuk universiti/institusi pengajian tinggi. Projek ini bertujuan menyediakan dan memperengkap istilah bahasa Malaysia untuk kegunaan universiti/institusi pengajian tinggi, khususnya apabila bahasa Malaysia digunakan sepenuhnya sebagai bahasa pengantar mulai tahun 1983. Buku *Istilah Kejuruteraan* sebelum ini, merupakan salah satu hasil daripada projek tersebut.

Bagi mendapatkan istilah yang tepat, ilmiah dan kemaskini, kerja-kerja pembentukan istilah banyak memerlukan tenaga, masa dan dedikasi serta dasar dan cara kerja yang baik dan teratur. Dalam melaksanakan projek ini, Dewan Bahasa dan Pustaka mendapat kerjasama pensyarah-pensyarah dan pakar-pakar bidang ilmu. Mereka bekerja dalam satu jawatankuasa untuk membentuk dan menyelaraskan istilah berkenaan.

Dewan Bahasa dan Pustaka merakamkan setinggi-tinggi penghargaan dan terima kasih kepada semua ahli Jawatankuasa Peristilahan Kejuruteraan Antara Universiti yang telah sudi menyumbangkan tenaga, kepakaran dan kerjasama mereka bagi menghasilkan buku *Istilah Kejuruteraan* ini. Ucapan terima kasih juga

ditujukan kepada semua universiti dan jabatan kerajaan yang telah memberi kerjasama dengan memberi kebenaran kepada ahli-ahli yang terlibat untuk menghadiri mesyuarat pembentukan dan penyelarasan istilah yang diadakan dari semasa ke semasa. Tanpa kerjasama pihak-pihak yang tersebut di atas mungkin projek ini tidak akan terlaksana dengan memuaskan.

Istilah dalam buku ini diharap dapat membantu para pensyarah, mahasiswa, pelajar dan pengguna lain dalam urusan seharian mereka. Dewan Bahasa dan Pustaka berharap dengan terbitnya buku ini, penggunaan istilah bahasa Malaysia dalam bidang berkenaan dapat diseragamkan.

PRAKATA PENYUSUN

Sejak tahun 1987, apabila Dasar Pelajaran Kebangsaan dilancarkan, semua universiti tempatan mulai menggunakan bahasa Malaysia sebagai bahasa pengantar bagi kebanyakan mata pelajarannya. Kekurangan istilah dalam bahasa Malaysia sering dikatakan menjadi masalah untuk menjayakan dasar tersebut. Selaras dengan itu, kegiatan penciptaan istilah bahasa Malaysia menjadi begitu giat dan penting.

Pada peringkat awal, tiap-tiap universiti telah membentuk dan menggunakan istilah masing-masing, sehingga menghasilkan istilah yang berbeza antara satu sama lain. Bertolak daripada masalah inilah, dibentuk Jawatankuasa Peristilahan Kejuruteraan Antara Universiti (JPKAU) pada Selasa, 3 November 1981.

Tujuan penubuhan JPKAU ialah untuk membentuk, menyeras dan menyelaraskan istilah Kejuruteraan dalam bahasa Malaysia supaya istilah-istilah berkenaan menjadi baku dan mantap. Matlamat jawatankuasa ini adalah untuk menjadikan bahasa Malaysia sebagai bahasa pengantar ilmu pengetahuan, terutamanya dalam bidang Kejuruteraan apabila telah wujud secukupnya istilah yang diperlukan.

Oleh kerana bidang Kejuruteraan ini agak luas, maka keahlian jawatankuasa juga agak ramai. Tiap-tiap subbidang/sub-subbidang

diwakili sekurang-kurangnya oleh tiga orang wakil daripada universiti-universiti yang berkaitan. Selain universiti/institusi pengajian tinggi, jawatankuasa ini juga diwakili oleh badan-badan lain seperti PUSPATI, TLDM dan Lembaga Peperiksaan.

Pada peringkat penyediaan senarai istilah, ahli jawatankuasa dibahagikan kepada beberapa kelompok mengikut kepakaran dan subbidang-subbidang yang berkaitan. Istilah-istilah yang telah dibincangkan di peringkat kelompok ini kemudian dibawa kepada jawatankuasa untuk diselaraskan di peringkat Dewan Bahasa dan Pustaka. Kerja-kerja penyelarasan istilah ini dibuat melalui mesyuarat penyelarasan istilah yang pada mulanya cuma diadakan sebulan sekali. Bilangan mesyuarat ini kemudian telah bertambah menjadi lebih kerap apabila timbul desakan untuk menggunakan istilah ini dengan cepat.

Saya ingin mengucapkan terima kasih kepada semua ahli yang telah dan sedang berkhidmat dalam jawatankuasa ini kerana telah bersungguh-sungguh menghadiri mesyuarat dan memberikan kepakaran masing-masing dalam menyelesaikan masalah mencari istilah yang betul. Sekalungan bunga yang khusus saya tujukan kepada semua kakitangan Dewan Bahasa dan Pustaka yang telah terlibat secara langsung atau tidak dalam usaha penerbitan buku ini terutamanya kepada Setiausaha dan Penolong Setiausaha Jawatankuasa ini. Tanpa usaha gigih mereka ini, saya rasakan buku ini akan mengambil masa yang lebih panjang untuk diterbitkan.

Akhirnya jawatankuasa ini ingin merakamkan setinggi-tinggi penghargaan kepada Naib Canselor, Dekan Fakulti, Ketua Jabatan, semua universiti dan badan-badan kerajaan lain yang berkaitan yang telah bekerjasama dalam usaha ini. Terima kasih juga kepada Ketua Pengarah Dewan Bahasa dan Pustaka yang telah sudi menerbitkan daftar istilah ini.

Usaha untuk mengumpulkan istilah yang lebih banyak dan khusus dalam kejuruteraan akan diteruskan.

Setakat ini, Dewan Bahasa dan Pustaka telah pun menerbitkan dua buah buku istilah kejuruteraan. Buku istilah kejuruteraan yang pertama dikeluarkan pada tahun 1970 berjudul *Istilah Kejuruteraan* dan mengandungi 15 568 istilah. *Istilah Kejuruteraan Awam* merupakan buku kedua yang diterbitkan pada tahun 1979 dan mengan-

dungi 2 200 istilah. Buku ketiga yang diterbitkan ini diharapkan dapat melengkapkan dan mengemaskinikan istilah-istilah yang terdapat dalam terbitan yang sebelumnya.

Walau bagaimanapun, kerana berbagai-bagai sebab yang tidak dapat dielakkan, terdapat beberapa perubahan dan perbezaan istilah di antara buku ini dengan buku istilah Kejuruteraan yang sebelumnya. Perubahan-perubahan dibuat hanyalah pada istilah-istilah yang dianggap penting. Di antara sebab-sebab perubahan yang dianggap perlu itu ialah:

1. Tambahan istilah

Contoh :

Bil.	Bahasa Inggeris	Bahasa Malaysia
1.	cone	kun (Kejuruteraan 1970) kerucut/kon (JPKAU)
2.	dimension	dimensa (Kejuruteraan 1970) matra/dimensi (JPKAU)
3.	consistency	konsistensi (Kejuruteraan Awam 1979) kekonsistenan/ketekalan (JPKAU)

JPKAU berpendapat istilah tambahan ini patut disertakan kerana:

- i. Istilah tersebut lebih kemelayuan misalnya 'matra' atau 'kerucut'.
- ii. Istilah ini pernah digunakan, dan popular tetapi tidak ditakrifkan dalam kamus, misalnya 'ketekalan'.

2. Perubahan Imbuhan

Perubahan imbuhan ini, kebanyakannya bersangkutan dengan akhiran-akhiran seperti *-able*, *-bility* dan *-vity* dalam bahasa Inggeris.

JPKAU mengambil keputusan, akhiran-akhiran tersebut patut diterjemahkan kerana ini akan memberikan penekanan makna yang lebih jelas.

Contoh:

Bil.	Bahasa Inggeris	Bahasa Malaysia
1.	compressibility	kemampatan (Kejuruteraan 1970) kebolehmampatan (JPKAU)
2.	permeability	ketelapan (Kejuruteraan 1970) kebolehtelapan

3. Perubahan Ejaan

Perubahan juga dilakukan terhadap ejaan beberapa istilah supaya selaras dengan *Pedoman Umum Pembentukan Istilah Bahasa Malaysia*, *Pedoman Umum Ejaan Bahasa Malaysia* dan *Daftar Ejaan Rumi Bahasa Malaysia*.

Contoh:

Bil.	Bahasa Inggeris	Bahasa Malaysia
1.	reactor	riaktor (Kejuruteraan 1970) reaktor (JPKAU)
2.	geometry	jometri (Kejuruteraan 1970) geometri (JPKAU)
3.	turbine	tarbin (Kejuruteraan 1970) turbin (JPKAU)

4. Pengkhususan Makna

Pengkhususan makna untuk peringkat pengetahuan yang lebih tinggi juga mendorong perubahan istilah.

Contoh:

Bil.	Bahasa Inggeris	Bahasa Malaysia
1.	reactor	riaktor (Kejuruteraan 1970) reaktor; peregang (JPKAU)
2.	flame	nyala-api (Kejuruteraan Awam 1979) nyalaan; lidah api (JPKAU)

Dalam contoh 1, 'reactor' membawa dua pengertian. Pengertian pertama berkaitan dengan alat yang digunakan untuk mengawal penghasilan tenaga nuklear. 'Peregang' pula merujuk kepada komponen dalam litar elektrik yang boleh menyimpan tenaga.

Dalam contoh 2, 'flame' juga membawa kepada dua pengertian. Pertama, merujuk kepada 'nyalaan', iaitu pengeluaran cahaya dan haba berlaku. Kedua, merujuk kepada hujung nyala api tersebut, dan ini boleh diistilahkan sebagai 'lidah api'.

5. Istilah Ukuran Elektrik

Sebelum ini, pembentukan istilah ukuran elektrik tidak mem-

punyai pedoman yang khusus. JPKAU menggunakan pedoman tambahan dalam pembentukan istilah tersebut. Dengan adanya pedoman ini, beberapa perubahan berlaku terhadap istilah-istilah sebelumnya.

Contoh:

Bil.	Bahasa Inggeris	Bahasa Malaysia
1.	volt meter	jangkavolta (Kejuruteraan 1970) meter volta (JPKAU)
2.	ohm-meter	jangka-ohm (Kejuruteraan 1970) meter ohm (JPKAU)
3.	spectrometer	jangka spektra (Kejuruteraan 1970) meter spektrum (JPKAU)

Istilah-istilah dalam buku ini telah dibentuk, disemak dan diselaraskan berdasarkan *Pedoman Umum Ejaan Bahasa Malaysia* dan *Pedoman Umum Pembentukan Istilah Bahasa Malaysia* yang diisytiharkan penggunaannya mulai 31 Ogos 1975, dan pedoman-pedoman tambahan yang disahkan oleh Jawatankuasa Tetap Bahasa Malaysia dan Majlis Bahasa Indonesia-Malaysia-Brunei Darussalam.

JPKAU menyedari mungkin terdapat beberapa perkara yang perlu diperbaiki dalam buku ini. Oleh yang demikian JPKAU sentiasa mengalu-alukan apa-apa teguran dan cadangan daripada semua pihak.

PANDUAN MENGGUNAKAN BUKU ISTILAH KEJURUTERAAN

Buku ini mengandungi senarai istilah Bahasa Inggeris-Bahasa Malaysia sahaja. Istilah ini disusun menurut abjad rumi dan tidak dikelompokkan menurut subbidang.

Contoh:

Bahasa Inggeris

abrasion
chock
chord
keyboard
module

Bahasa Malaysia

lelasan
seengkang
perentas
papan kekunci
modul

Buku ini hanya memuatkan senarai istilah dan tidak memberikan pengertian tiap-tiap satu istilah. Oleh yang demikian pengguna haruslah faham akan makna yang didukung oleh tiap-tiap kata itu, untuk menyesuaikan penggunaannya.

Tanda (:) yang terdapat dalam buku ini menunjukkan istilah ini mempunyai lebih daripada satu makna dan mestilah digunakan mengikut konteks.

Contoh:

BIL.	BAHASA INGGERIS	BAHASA MALAYSIA
1.	vessel	vesel; bekas/bejana
2.	operation	pengendalian; kendalian

Pada contoh 1, 'vesel' merujuk kepada sejenis kapal, manakala 'bekas/bejana' merujuk kepada bekas yang selalu digunakan untuk menyimpan air dan lain-lain, manakala pada contoh 2, 'kendalian' merupakan hasil daripada keluli, manakala 'pengendalian' merupakan proses mengendali.

Tanda (/) ialah untuk menandakan istilah yang sama makna untuk bersinonim dan terserahlah kepada pengguna untuk menggunakannya.

Contoh:

BIL.	BAHASA INGGERIS	BAHASA MALAYSIA
1.	dimension	matra/dimensi
2.	aerofoil	aerofoil/kerajang udara

Ini bermakna, perkataan 'matra' atau 'dimensi' boleh digunakan untuk perkataan bahasa Inggeris 'dimension' dan 'aerofoil' atau

'kerajang udara' untuk perkataan Inggeris 'aerofoil'.

Walau bagaimanapun, istilah yang didahulukan itu ialah istilah yang penggunaannya digalakkan dan istilah yang dikemudiankan itu ialah sinonimnya yang diharapkan akan beransur-ansur hilang daripada penggunaan umum.
